

WHAT IT DOES

The whole front-desk job, at 3 a.m.

Answers in one ring. Every time. Including the ones you're sleeping through.

■ Books into your calendar

Real availability, on the call — not a callback promise.

■ Knows what is urgent

Emergencies follow your protocol. Routine work gets scheduled.

■ Transfers to the right person

Trained on your roster, so it reaches whoever actually covers it.

■ Hands over a completed intake

Your callback starts informed, not from a name on a message pad.

■ Reminders, then the review ask

Cuts no-shows, then invites the review once the appointment passes.

■ Filters the spam

Robocalls never reach your team.

It does not replace your front desk. It makes sure the desk is never the reason a call went unanswered.

WHY NOT AN ANSWERING SERVICE

A message is not a booked appointment.

Three people calling at once is three calls answered — not two voicemails.

■ It answers the question

What it costs, whether you take their insurance, how soon you can come. A message taker can't answer any of it.

■ It never has an off day

The last call on Friday gets the same patience as the first on Monday.

■ Not your problem after hours

No after-hours phone to carry, no voicemail box to clear in the morning.

AND IT STAYS YOURS

■ Built around how you work

Your services, your prices, your own rules for what counts as an emergency. Not a template with your name dropped into it.

■ Change anything, same day

New hours, new pricing, a new rule. Nothing for you to log into.

■ We do it all

Prices change, staff change, hours change. Keeping it current is our job, not yours.

HOW IT WORKS

Live in about two weeks.

On your existing number. No new hardware.

01 We know your business

One call. Your services, your pricing, what counts as an emergency and who it reaches.

02 We build it, you break it

You get a number to call and test until it sounds like the person you would have hired.

03 It goes live

All calls, after-hours only, or just the ones your team cannot get to.

Month to month. If it is not earning its keep, you stop.
